

ePAWs 2.0 - Release Notes

Release Date: July 23, 2026

Overview

This release delivers a number of bug fixes and enhancements focused on proposal management, award record accuracy, program summary data, and workflow improvements across the ePAWs 2.0 system. The updates below are organized by functional area.

Bug Fixes

Awards

- **Deactivated Award - Dates Defaulting to January 0001:** Resolved an issue where dates on a deactivated award record were incorrectly defaulting to January 0001 rather than displaying the correct values. (*NEUEPAW-16484*)
- **Legacy Obligation Not Shown in Program Summary:** Fixed an issue where legacy obligation amounts were not being displayed in the Program Summary. (*NEUEPAW-16465*)

Personnel

- **Research Job Role - Researcher Classification Logic:** Corrected the logic used to identify and mark a person with a research-related job as a Researcher, ensuring personnel are classified accurately across records. (*NEUEPAW-16290*)
-

Improvements & Enhancements

Proposals & Awards

- **Separate Views for Proposal vs. Award Information:** Continued enhancements have been made to create distinct views of information captured at the time of proposal versus the time of award, providing greater clarity and accuracy when reviewing record data. (*NEUEPAW-16015, NEUEPAW-16016*)
 - **On Hold Restriction - Proposals with Completed Transactions:** The system now prevents a proposal from being placed on hold if there is a related completed transaction, reducing the risk of workflow conflicts. (*NEUEPAW-16382*)
-
