

# ePAWs 2.0 – Release Notes

Release Date: August 6, 2026

---

## Overview

This release delivers a number of bug fixes and enhancements focused on award and proposal record management, credit split accuracy, transaction identification, and Program Summary improvements across the ePAWs 2.0 system. The updates below are organized by functional area.

---

## Bug Fixes

### Credit Splits

- **Credit Split – Incorrect Data When Lead PI Changed:** Resolved an issue where the Credit Split table displayed incorrect data when the Lead PI was changed from a user with a primary affiliation in their personal profile to a user without one. *(NEUEPAW-16424)*
- **Credit Split – Incorrectly Updated When Changing Lead Unit:** Fixed an issue where the Credit Split section was being incorrectly updated when the Lead Unit was changed in the General Information tab. *(NEUEPAW-16426)*

### Award Acceptance Requests (AAR)

- **AAR Copy – Sponsor/Prime Sponsor Not Carried Over:** Resolved an issue where the sponsor and prime sponsor information was not being copied when previous AAR data was used to populate a new AAR. *(NEUEPAW-16506)*

### Personnel

- **Researcher Classification Logic:** Corrected the logic used to identify and mark a person with a research-related job as a Researcher, ensuring personnel are classified accurately across records. *(NEUEPAW-16290)*
- 

## Improvements & Enhancements

### Awards & Transactions

- **Legacy Action Pop-Up – Related Proposal Information:** The Legacy Action pop-up has been updated to display related proposal information after the obligated amount, and users can now search for and select legacy records directly from this pop-up. *(NEUEPAW-16401)*
- **AAR Wizard – Related Proposal Information and Obligation Dates:** Users can now edit Related Proposal information in the AAR wizard after the Obligated Amount Total field. Additionally, the Award Record's Award Obligation Summary grid now displays the linked proposal number and obligation dates below the Transaction Number for improved visibility. *(NEUEPAW-16402)*

- **Transaction ID – New Numbering Format:** The default numbering sequence for Transaction IDs has been updated to a structured format: T-[Transaction Type]-[FY]-[Sequence Number] (e.g., T-NoA-26-0002), making transactions easier to identify and reference. *(NEUEPAW-16436)*

### **Program Summary**

- **Program Summary – Two New Expandable Panels:** Two new expandable panels have been added to the Program Summary: one for Legacy actions and one for ePAWs 2.0 Transactions, providing a more organized and comprehensive view of record activity. *(NEUEPAW-16403)*
